EXECUTIVE SUMMARY

Pre-final year Artificial Intelligence and Data Science student with a strong interest in building intelligent, data-driven applications. Proficient in Python with hands-on experience in machine learning, data analysis, and end-to-end ML model development. Familiar with R, C, and SQL, and experienced in developing predictive models and interactive web applications through academic projects and internships. A quick learner with strong analytical and problem-solving skills, continuously learning new technologies to contribute to impactful AI and data science solutions.

SKILLS

- **Programming:** Python, C, SQL, R (Basics)
- **Machine Learning:** Regression, Classification, Random Forest, Naive Bayes, XGBoost, SVM, Model Evaluation, Feature Engineering
- **Deep Learning:** TensorFlow, Keras, CNN, RNN, LSTM
- **Natural Language Processing:** TF-IDF, Text Classification, Tokenization, Prompt Engineering, Character n-grams
- **Computer Vision:** OpenCV, Image Processing, Real-Time Video Analysis, Face Liveness Detection
- **Data Analysis & Processing:** Pandas, NumPy, Data Cleaning, Statistical Analysis
- **Application Development & Deployment:** Streamlit, Tkinter, React, Formspre, Vercel
- **Visualization:** Matplotlib, Seaborn, Power BI

PROJECTS

RAPTOR AI – AI-Powered Chatbot | *Python, Streamlit, Groq API, NLP*

- Developed an AI-powered chatbot for programming, logical, and mathematical queries.
- Integrated Groq API for ultra-low latency language model inference.
- Designed an intuitive Streamlit interface for real-time interaction.

Bike Resale Value Estimator | *Python, Machine Learning, Regression, Streamlit*

- Built a regression-based ML system to predict motorcycle resale prices.
- Analyzed features including brand, model, year, mileage, ownership, and condition.
- Implemented an interactive Streamlit interface for instant price estimation.

NLP Based Language Identification System | *Python, NLP, TF-IDF, Naive Bayes, Streamlit*

- Developed a machine learning-based text classification system to automatically detect the language of input text.
- Implemented character-level TF-IDF feature extraction with Multinomial Naive Bayes classifier.
- Designed and deployed an interactive Streamlit web interface for real-time language prediction.

AI-Based Network Intrusion Detection System | *Python, Random Forest, Cybersecurity*

- Developed a real-time intrusion detection system to monitor network traffic.
- Used Random Forest classification to identify malicious activity.
- Visualized network behavior for enhanced threat analysis.

Cybersecurity Keyboard Event Monitoring System | *Python, Tkinter, Cybersecurity*

- Developed a controlled keyboard event monitoring system to capture and analyze keystroke patterns.
- Recorded keystrokes and time intervals between inputs, storing data securely in JSON and text formats.
- Designed a Tkinter-based graphical interface to provide real-time visualization of monitored events.

Hand Danger Detection System | *Python, OpenCV, Computer Vision*

- Implemented real-time hand detection using computer vision techniques.
- Classified hand proximity into SAFE, WARNING, and DANGER zones.
- Generated instant alerts for industrial safety monitoring.

INTERNSHIP EXPERIENCE

AI & Machine Learning Intern

Remote

NSP Nexus, Chennai

23rd June 2025 – 23rd July 2025

- Developed AI-driven applications, including a chatbot system, for real-time use cases.
- Built and deployed interactive Streamlit interfaces to support model inference and visualization.
- Assisted ML workflows through data analysis, model evaluation, and system integration.

Cybersecurity with Gen AI Intern

Remote

VOIS for Tech – AICTE & Edunet Foundation

09th Dec 2025 – 06th Jan 2026

- Developed practical security projects including a Cybersecurity Keyboard Event Monitoring System and AI-Based Network Intrusion Detection System.
- Gained hands-on exposure to cybersecurity fundamentals, AI integration, and practical security implementations.
- Performed network analysis using Wireshark, simulated secure networks with Cisco Packet Tracer, and explored browser security testing using BeEF in a controlled lab environment.

EDUCATION

B.S. Abdur Rahman Crescent Institute of Science and Technology

Chennai, India

B.Tech – Artificial Intelligence and Data Science

2023 – 2027

CGPA: 9.39

Vyasa Vidyalaya Matriculation Higher Secondary School

Chennai, India

12th Grade – 92%

2022 – 2023

CERTIFICATIONS

- Machine Learning – CodeChef
- Complete Machine Learning & Data Science – GeeksforGeeks
- The Joy of Computing Using Python – NPTEL (76%)
- Python for Data Science – Great Learning
- Data Analytics Job Simulation – Deloitte
- Advanced Data Visualization using Power BI – Guvi

ACHIEVEMENTS / ACTIVITIES

- Participated in National Level 24-Hour Hackathon
- Participated in National Level Technical Symposium
- Completed Workshop on "R for Data Science"
- Completed Workshop on "Distributed Big Data Processing & Cloud Services"
- Completed Workshop on "Deep Learning & Neural Networks"
- Completed Workshop on "Evolution of GPT Models"
